

## RURAL DEVELOPMENT AND FOOD SECURITY

Agriculture and livestock are important for the development of the countries where we operate in and for the improvement of the populations welfare. Our action prioritises the local associations strengthening in terms of production and trade, as well as promoting security and food sovereignty networks and regional agricultural planning. In the past years, technical capacity building actions, training, production and creation of micro enterprises have embraced, directly and indirectly, about 500 thousand people, mainly in Brazil and in Guinea-Bissau.
