CAMPAIGNS OF ENVIRONMENTAL AWARENESS AND FIGHT AGAINST SEXUALLY TRANSMITTED DISEASES AND OTHER PANDEMICS

Activities | Results

- Raise awareness of the population, in particular, beneficiary communities of the project, on the importance of preventing sexually transmitted diseases (HIV/AIDS) and other pandemics (zika, malaria and dengue), as well as about environmental protection and preservation.
- Provide more information about STDs prevention, with a special focus on HIV/AIDS, targeting taxi drivers working near the airport and construction workers engaged on the expansion and modernisation work of the above-mentioned airport.
- Promote a better understanding of the problems and challenges of beneficiary communities with the appropriate authorities responsible for public health and environment and of the companies, to better solve the constraints.
