OPENING NOTE

In 2020, we pursued the Instituto Marquês de Valle Flôr’s main strands of action, with the development of various development cooperation projects in several countries, with an emphasis on global citizenship activities, by supporting the work of local authorities and civil society, in Portugal and in other countries, and through actions and partnerships for the promotion of reflection and debate on the Sustainable Development Goals (SDGs) and the global challenges that we are currently facing.

We seek to guide our actions in accordance with the dual interests and aspirations of the most vulnerable populations and with actions aiming at the planet’s sustainability.

We respect the principles that guide our activity, namely the respect for human dignity and the establishment of partnerships and other forms of collaboration with public, private and civil society entities in the countries and places where we work.

We keep working in the countries and areas of intervention where we operate, on the assumption of consolidating and maintaining the quality of our intervention and of an enlargement policy to new areas and territories/geographical areas, based on capacity building, the establishment of partnerships and financial sustainability.

On one hand, in 2020 we acknowledge the continuity of factors that we had already characterised in last year’s Report “(...) the impact of populist nationalism in several states, both in Europe and beyond, with hostility towards migrants and isolationism (...). Climate change, extremism movements and the escalation in social and ethnic tensions in several countries are also major obstacles to our work, even when it is aimed precisely at mitigating risk factors”.

On the other hand, the COVID-19 pandemic, the first global threat that has conditioned and keeps conditioning our action and many others, has triggered scheduling implementation and resource availability constraints and has also affected our partners’ availability and capacity, making it more difficult to launch new projects. Despite the pandemic’s seriousness and implications, it should be noted that the experience gathered in some of our main focuses of action, such as, for instance, health, rural development and institutional capacity building, allowed the Institute to consolidate its presence and relevance in its intervention scenarios.

It was in this complex environment that we developed our work, having achieved the objectives and goals that are stated in this Report and, consequently, contributed to reinforce the notoriety of IMVF, due to the commitment of the hundreds of collaborators we have in various geographical areas. As always, I leave a word of recognition for the support that our funders, mainly the European Commission and Camões, I.P., have continuously provided to the Institute.

To conclude, I would like to highlight the IMVF staff’s professionalism and responsibility. They end up being the Institute and, therefore, once again I reaffirm my appreciation for their work.

Paulo Telles de Freitas
Chair of the Administration Board
OUR YEAR AND
THE FUTURE
GENERAL ACTION GUIDELINES (LINES OF ACTION)

The IMVF has been continuously aligning its cooperation strategy with the 2017 New European Consensus for Development and the 2030 United Nations Agenda on Sustainable Development Goals (SDGs).

Since the funds that support our projects are mostly provided by European calls, we have been closely following the European Union developments, the new European Commission’s announced priorities, the Green Economy (fighting climate change and accelerating the energy transition) and Technological Revolution (modernization and improvement of European competitiveness on a global scale) and their relationship with IMVF’s and partners’ action priorities.

In fact, Development Cooperation appears as a subsidiary of these strategies and of national interests - in this case, as a continuity of immigration flow control policies, which have been including support for creating economic opportunity activities, particularly for young people in neighbouring countries and regions. Alongside, and as part of the priority it continues to give to achieving SDGs, the European Union is keeping up its support for the eradication of extreme poverty, for rural development and job creation projects in the most vulnerable countries - objectives that are intrinsically part of our activity.

The new European Commission announced priority to strengthen Africa-Europe relations, and given the concentration of projects on the African continent, is conducive to the Institute’s present and future activities.

As mentioned in last year’s report, although the European Union remains the main source of funding, the IMVF has maintained its strategic partnership and complementarity with Portuguese Cooperation, in which Camões, I.P., alongside with the European institutions, is the other mainstay for financing our activities implementation, particularly with the possibilities of participating in delegated cooperation projects, whose expansion is a priority for the Portuguese authorities.

A NEW ENVIRONMENT FOR ACTION

Under the Activity Plan for 2020, approved in October 2019, the implementation of a set of activities and initiatives in various areas was outlined.

The year 2020 was, however, marked by the COVID-19 pandemic, with striking effects on the population’s health, on the global economy and on the countries in which we carry out our action.

The changes that occurred as a result of the pandemic had an impact on the planning that was initially foreseen for IMVF activities in the various countries in which it operates, particularly with regard to the pace of their implementation, with exception of the health domain, as well as in the implementation of some of the programmed field missions. In light of this context, addendums were signed to extend the completion period of some projects, as for example in Colombia.

Despite the constraints generated by the pandemic, IMVF’s activity continued on several fronts, and in some cases was even intensified, namely the contract award, in the Health area, of projects within the scope of the fight against COVID-19, namely in São Tomé and Príncipe and in Guinea-Bissau. It is also worth highlighting the extension, for one additional year, of the “Health for All” project, implemented by the Associação Marquês de Vale Fôr (AMVF) in São Tomé and Príncipe, with IMVF as a partner.
The realities at global and European levels and in the locations in which we operate, characterised by rapid and in some cases structural changes, has reflected both directly and indirectly in the NGDOs’ work, including the IMVF. We have therefore continued to prioritize strategic reflection on the dynamics affecting our fields of action, particularly the isolationist impulses and their reflections on the financing and implementation of cooperation and development activities.

Despite the context changes triggered by the pandemic and the complexity of the challenges faced, the IMVF’s action has expanded and there is a positive assessment of the work carried out, as the Institute continues to prioritize the establishment of partnerships in the intervention sectors and countries. The capacity building of local, public and civil society actors remained at the heart of the adopted strategies and approaches, in order to sustain greater national and local autonomy, during and after the projects’ implementation period.

OUR ACTIVITIES

The 2020 IMVF activities are summarised below, by country in which the activity took place.

- **In Gambia**, we pursued the first Portuguese cooperation project in that country, Tekki Fii - Building a Future: Make it in The Gambia, focusing on rural development actions and on working with youth.

- **In Colombia**, we also continued the Institute’s first project in the country, aiming to stabilize and support the development of a region where, until recently, there was a high intensity of military and guerrilla actions. As a result of the impact of the COVID-19 pandemic, this project, Caquetá Sustainable Territories for Peace, was extended for a further year.

- **In Guinea-Bissau**, we remained a reference institution in maternal and child healthcare, carrying out activities throughout the country with the PIMI II project - Integrated Programme for the Reduction of Maternal and Child Mortality: Strengthening the Availability and Quality of Maternal and Child Health Care Component. The lannda Guiné Galinhas, for rural development, and the lannda Guiné! Djuntu, for civil society support projects were also continued. In 2020 the Etikapun n’ha - Urok, Bijaçô Culture Resilience Laboratory project was completed.

- **In São Tomé and Príncipe**, we continued our intervention in the health sector, having initiated the Support the COVID-19 Response in São Tomé and Príncipe Project. The Health for All - Towards Sustainability project, undertaken in partnership with AMVF, was extended for a further year to 2021, and the food governance project Sustainable Agro-Food Policies continued, which seeks to contribute to food and nutritional security and sustainable development in São Tomé and Príncipe, by strengthening and empowering civil society. In the area of Education, we continued the Integrated Support Programme for the Education Sector, for secondary and higher education, with teachers’ training across the country and teaching of Portuguese Language and Mathematics in the Príncipe region. For this purpose, this project has the technical assistance of the Universities of Aveiro and Évora and the partnership of the University of São Tomé and Príncipe.

- **In Cape Verde**, we started a nationwide project on the inclusion of children and young people with neurological disabilities. We also proceeded with Maio Island’s Solidarity and Community Tourism project for supporting investment in community-based tourism. Two projects in the civil society intervention area were initiated, one being the Inclusion of Children and Young People with Neurological Disabilities Promotion and the other OVERCOMING the Pandemic on the Santo Antão, São Vicente and Maio islands.
In Angola, we gave continuity to the agricultural technical assistance project in Huambo, Bié and Malange provinces, Value Chain Service Provider For Investment Feasibility with the aim of increasing the main local agri-food products.

In Portugal, we continued to develop diversified activities. In the Global Citizenship domain, we have concluded two projects, namely Global Citizenship Challenges and the SDG Generation and initiated four other projects, #ClimateOfChange (pan-European campaign for a better future), #GoEAighetical - Our Food, Our Future (European campaign for the promotion of fairer, more dignified and sustainable development), #Coerêncianapresidência (Presidential coherence) - Global Development Advocacy and, finally, TAS - Thesis, Antithesis, Synthesis - Migration Labs.

Regarding Inter-municipal Cooperation, we continued to act within the partnership framework with the Inter-municipal Network for Development Cooperation (RICD, in Portuguese), we carried on with the ACCIONAD-ODS project, comprising actions to achieve the Sustainable Development Goals through the engagement of local actors in Portugal and Spain, as well as with the “Towards 2030” (Rumo a 2030) project, consisting of a SGD promotion campaign and education for development and global citizenship, involving 22 municipalities, and having been initiated the People and Planet project: a Common Destiny, a pan-European campaign for mobilizing young citizens and local authorities in the struggle against climate change.

Regarding Strategic and Development Studies, we continued to carry out our activities, such as, original works publishing with three IMVF Briefs and one IMVF Policy Paper; training activities, with the 6th Global Challenges Summer School in partnership with ISCTE-IUL; seminar activities, with the 7th World Press Photo Conference on “Geopolitical Trends in the Context of the Pandemic” in partnership with Maia Municipal Council; and lecture activities, two of which stands out at the Military University Institute and another at the National Defence Institute. The main partnership in this area continued to be with the Lisbon Club, of which the IMVF is a founding member, highlighting the holding of the 4th Lisbon Conference on “The Acceleration of Global Changes and the Pandemic Impact”, 3 Lisbon Talks and 20 Lisbon Speed Talks.

Finally, it is worth highlighting the deepening of the partnership established between the IMVF and Chatham House - The UK’s Royal Institute of International Affairs, with the drafting of a common paper for the Melinda and Bill Gates Foundation.

In 2020, the Communication sector adapted its work according to the demands resulting from the COVID-19 pandemic, pursuing its mission of promoting the IMVF’s action, at an institutional and project level, and contributing to strengthen the Institute’s reputation in the various intervention areas and locations where it operates.

The IMVF pursued its policy of hosting trainees through collaboration protocols established with several Portuguese universities. The trainees were integrated in different Units and provided support to various activities carried out throughout the year.

In conclusion, despite the constraints posed by the COVID-19 pandemic, in 2020 we strengthened IMVF’s position as a benchmark institution in various countries and domains of intervention.
FINANCIAL SUSTAINABILITY, AN UNDENIABLE STRATEGIC OBJECTIVE TO BE PRESERVED

The financial analysis for 2020 is marked by the beginning of nine projects with a global amount of around 3,500 m€.

It is also noteworthy that the “Health for All” project in São Tomé and Príncipe was extended for another year, with the Associação Marquês de Valle Flôr (AMVF) as project leader and IMVF as partner.

From a macro perspective, there is a 10% growth in the amount of portfolio projects:

However, despite the pandemic, in 2020 the total executed amount was 8,424 m€, approximately 27% above the registered amount in 2019:

DELEGATIONS / REPRESENTATIONS

GENERAL EXECUTIVE ADMINISTRATION

In terms of organisation, the organic structure of 2019, represented in the following diagram, has been preserved.
As such, and despite the strong economic crisis resulting from the pandemic triggered at the beginning of 2020, the Institute obtained a Net Result for this financial year of 16,269,53€.

In accordance, it is proposed that this Net Result be transferred to the Retained Earnings account.

Regarding assets and liabilities, as stated in the financial statement, there are no significant changes except for the ones mentioned above, namely the increase in future liabilities due to the beginning of new projects.

With respect to human resources’ management, the promotion of a framework for improving efficiency, productivity and maximising internal coordination processes continued to be pursued, in order to fulfil IMVF’s noble mission.

The Executive Board wants to take this opportunity to express its gratitude and to emphasise the high level of competence, dedication and spirit of purpose of all the staff, without which it would not have been possible to reach the defined targets.

We are aware of the enormous challenges that lie ahead, which requires an even greater effort, from all of us, to be able to continue to respond to the challenges that arise on a daily basis, both in terms of locations and projects that we develop and in the effort to maintain the existing permanent workforce.

Regarding the financing of projects implemented by the IMVF, this was the progress by type of financing entity:

In fact, the European Union recorded a significant increase of approximately 30%, mainly as a result of the greater development of the PIMI II, Ianda Guiné Djuntu and Building a Future - Make it in The Gambia projects. As for the Portuguese Government, namely Camões, I.P., a decrease of approximately 17% was registered as a result of the completion of the ACES - Secondary Education Consolidation Support Project in 2019 in São Tomé and Príncipe.

Regarding financial results, there has been an increase in subsidies included in the Income Statement, amounting to around 8,200 m€.

It should be however noted that in 2020 there was a decrease in Services Delivery, namely due to the lower invoicing to AMVF of the human resources costs allocated to the Health for All project, managed by the latter, as well as the correction of services invoiced within the MOSAP II project. This budget heading amounted to approximately €176.

Overall, costs decreased by about 23% as a result of the interruption of many face-to-face activities, namely in business travels and new market and financial sources prospecting events, as well as in operational expenses.

Unlike previous years, the financial provision was reduced according to the Equity Method, pertaining the 100% equity owned by the IMVF in Valle Flôr Consulting, Lda. that was established in March 2017.
We actively contribute towards sustainable development and human dignity by designing, implementing and collaborating in projects and activities in a diverse range of areas.

WHAT WE DO

WHO WE ARE

Created in 1951 as a private institution of public utility, IMVF is a foundation for development and cooperation that started its activity as a NGDO in 1988, in São Tomé and Príncipe. From the 90s onward, we have expanded our action to other countries, mainly Portuguese Speaking Countries and broaden our scope of intervention. In 2017 we widened again our sphere of activities to new geographies in Africa and Latin America as well. The results achieved have turned IMVF into a key stakeholder in Development Cooperation, Global Citizenship and Development thinking.

RAISON D’ÊTRE

The promotion of human dignity, which includes equal rights and opportunities and justice for all, improving the welfare of the most vulnerable populations, thus fighting against exclusion, and contributing towards a more sustainable planet, as a cornerstone to ensure good living conditions for present and future generations. This is the framework of what we do and how we do it.

HOW WE WORK

Assuring best practices and strengthening communities, public entities and civil society regarding the respect of values and principles such as solidarity, gender equality, sustainability, accuracy and transparency are at the core of our work. Working in close cooperation with our partners in Development, alongside with the commitment and motivation of about 250 staff workers, of which more than 90% are involved on field work, have ensured the quality and relevance of our actions.

“Our hospital [Regional Hospital of Gabú] has the support and cooperation of the Instituto Marquês de Vale Fôr. We have the contribution of a gynaecology-obstetrics and paediatric specialist Cuban doctors team and a fetal medicine nurse specialist who have been of great support. The hospital receives many eclampsia, hypertensive pregnant women as well as paediatric patients, children with anaemia and severe malaria, and our main goal is to decrease maternal and child mortality. We had a two-stage maternal-fetal ultrasound (obstetric ultrasound) training course. This training was extremely helpful for pregnant women, we performed many ultrasounds and ended up detecting some fetal malformations, for example, a cardiogenic malformation, a fetus with heart problems.”

Ronízio Bathy, Regional Hospital of Gabú Director, Guinea-Bissau, PIMI II

“The experience of training doctors and nurses on the management of the COVID-19 pandemic in São Tomé and Príncipe proved to be intense and of great sharing. The trainees were engaged, willing to participate and interested, and exceeded our expectations. After the theoretical input, the daily practice provided concrete results with trainees witnessing the effects on their daily routines, however, what impressed me the most were the moments of sharing on how each healthcare professional in their context lived the COVID-19 pandemic first months. It was with great emotion that we realised how connected we all are to living the same emotions, fears, and apprehensions towards the unknown and how each individual in their context gives their very best and fully commits to what they should and need to do. These are “give and take” experiences that work out well for all parties involved.”

Cristina Alves, “COVID-19: infection prevention and management” nursing instructor, in São Tomé and Príncipe

This is one of the core intervention areas of IMVF, due to the importance of health issues in development and well-being of populations. Our action is promoted in liaison with public authorities, within a structured and sustainable framework, with a special focus on maternal and infant healthcare and with the support of innovative telemedicine resources and means. The direct and indirect beneficiaries of our projects amount to more than four million people in several countries, particularly in São Tomé and Príncipe, Guinea-Bissau and Angola.

Health to All – Towards Sustainability
PIM II – Integrated Programme for The Reduction of Maternal and Child Mortality
Support the Covid-19 Response in Guinea-Bissau
Support the Covid-19 Response in São Tomé and Príncipe

IMVF Annual Report 2020
OBJECTIVES

Overall: contribute to the universal access of the population of São Tomé and Príncipe to quality healthcare.

Specific: promote the improvement, autonomy and gradual sustainability of preventive, primary and specialised healthcare services.

BENEFICIARIES

The entire population of São Tomé and Príncipe (around 187,356 residents) as users of the national health system; professionals of the national health system (60 physicians and 348 nurses) benefiting from in-country training during specialised medicine’s missions and through telemedicine; 4 physicians benefiting from long-term training in Portugal (3 years); 1 technician on imaging, 1 technician on equipment maintenance and 1 technician on health information and statistics benefiting from short-term training in Portugal (6 months).

BUDGET

€ 3,880,000

FINANCING

Camões, I.P. and DGS - Directorate General for Health of Portugal

PARTNERS

Ministry of Health of São Tomé and Principe and Associação Marquês de Vale Flôr (AMVF)

* IMVF is a partner of the project “Health for All – Towards Sustainability” implemented by the AMVF
GLOBAL ACTIVITIES

• Widening and consolidating of regular remote clinical support, through doctor appointments and exams via Telemedicine between Portugal and São Tomé and Príncipe;
• Maintenance of short-term missions of Portuguese specialised physicians to São Tomé and Príncipe, always bearing in mind the restrictions and constraints arising from the context of the COVID-19 pandemic’s spreading;
• Theoretical and practical training actions and capacity building in-service addressed to national health professionals within the scope of short-term medical specialty missions;
• Holding of the 8th edition of the Luso São Tomé Otorhinolaryngology Seminars;
• Follow-up of the long-term medical training (3 years) in Portugal of 4 São Tomé clinical board members on specialised medicine: Ophthalmology, Gastroenterology, Imaging and Obstetrics and Gynaecology;
• Completion of the works and space equipping for the establishment of a Gastroenterology Unit at Dr. Ayres de Menezes Hospital;
• Acquisition and provision of medicines, equipment, medical-surgical supplies, medical consumables and reagents for use under the specialties medical missions at Dr. Ayres de Menezes Hospital and to support the primary healthcare network at district level;
• Support to National Programmes against the Major Endemic Diseases (Malaria, HIV-AIDS and Tuberculosis) through the provision of medicines, equipment and complementary means of diagnosis.

FACTS AND FIGURES

35 short term missions in 7 medical specialities and in 2 technical areas
4 project monitoring and evaluation missions
1,894 appointments of specialised medicine within short-term missions
254 surgical operations within short-term missions
22,756 complementary diagnostic tests
777 clinical sessions through Telemedicine
2 doctors completed their speciality training in Gastroenterology and Imaging in Portugal (the first ones in São Tomé and Príncipe)
1st Dermatology Unit at Dr. Ayres de Menezes Hospital was created and inaugurated
JUN 2017 – MAY 2021
GUINEA-BISSAU

OBJECTIVES
Overall: contribute to the reduction of maternal, neonatal and child mortality in Guinea-Bissau and, in particular, for the achievement of the Sustainable Development Goals (SDGs) targets.
Specific: ensure a better access to quality healthcare for pregnant women and women who have recently given birth (up to 45 days after childbirth) and children under 5 years of age in Guinea-Bissau.

BENEFICIARIES
Direct: 319,771 children under 5 years of age, 413,821 women of reproductive age as users of the National Health Service and 1,200 health professionals in the 132 health areas of Guinea-Bissau.
Indirect: the entire population of Guinea-Bissau (1,881,005 residents).

BUDGET

*Consolidated amount of the 3 contracts currently in force that this programme comprises
FACTS AND FIGURES

132 healthcare units covered in the 11 Guinea-Bissau health regions

+ 1,200 maternal and child healthcare technicians from Guinea-Bissau benefiting from in-service training and quarterly performance bonus

8 physicians and 20 nurses from Guinea-Bissau and 5 physicians and 4 nurses from Cuba integrated in the PIMI II clinical team

125 medicines and essential medical supplies purchased, kept in a 400m² warehouse in Bissau and made available on a permanent basis

+ 1,300 medical-surgical equipment and materials, with a total volume of +300m³, imported, stored, distributed and installed

16 drivers, 8 logistics staff, 2 pharmacy technicians and 2 equipment maintenance technicians from Guinea-Bissau involved in the medicine and medical-surgical equipment distribution

1 truck, 1 van, 17 off-road vehicles and 2 motorbikes involved in the medicine distribution and daily transport of the clinical trainers team

ACTIVITIES IN 2020

• Acquisition, implementation of the logistics chain, programming and distribution of medicines, medical consumables and medical-surgical materials in the 132 covered health care facilities;

• Update and implementation of the Instrument for Measuring Medicines’ Needs, in order to define and update the basic stock in the 132 health structures;

• Carrying out of in-service capacity-building and monitoring, by the PIMI clinical team in the covered healthcare units;

• Award of performance-based quarterly bonuses to health and management professionals assigned to the various national child and maternal healthcare structures;

• Rehabilitation and infrastructural interventions to ensure a permanent water and electricity supply in the surgical block and paediatric, maternity, blood bank services in 5 Regional Hospitals and Reference Health Centres;

• Holding of the interim dissemination session for the IMCI II/IMVF results, in December;

• Drafting of the strategic document “Challenges of the National HealthCare System and Prospects for the EU Intervention Consolidation in Guinea-Bissau’s Maternal and Child HealthCare Sector” and its sharing with the Guinea Bissau European Union Delegation.
MAY 2020 – OCT 2020
GUINEA-BISSAU

OBJECTIVES
Overall: To contribute to the reinforcement of Guinea-Bissau’s response capacities to the COVID-19 pandemic.
Specific: To promote the improvement of the health services’ welfare capacities within the Guinea Bissau Reference Structures designated to respond to the COVID-19 pandemic.

BENEFICIARIES
Direct: COVID-19 patients and severe acute respiratory syndrome patients, as well as the healthcare professionals assigned to the reference healthcare facilities benefiting from the action, the Simão Mendes National Hospital, the Cumura Hospital and the Bor Hospital.
Indirect: At least the 1,881,005 inhabitants of the 9 administrative regions that are part of Guinea-Bissau.

SUPPORT THE COVID-19 RESPONSE IN GUINEA-BISSAU
GLOBAL ACTIVITIES

- Acquisition of medical equipment and consumables to combat COVID-19 according to the identified priorities, their operational effectiveness and taking into account the welfare reality in Guinea-Bissau;
- Logistics network implementation for importing and making the acquired equipments available;
- Healthcare technicians capacity building, within the COVID-19 Referral Structures, for the installation, correct handling and maintenance of the clinical support equipment and materials provided.

FACTS AND FIGURES

- 1,600 kg and 12 m³ of medical supplies made available to combat COVID-19

3 Reference Health Structures equipped with clinical support material and equipment required to respond to COVID-19 in Bissau (Simão Mendes National Hospital, Cumura Hospital and Bor Hospital)

14 laboratory technicians benefiting from capacity building actions on handling and good management of the medical equipment acquired (4 technicians from Simão Mendes National Hospital, 4 technicians from Cumura Hospital and 6 technicians from Bor Hospital)
OBJECTIVES

General: strengthen São Tomé and Príncipe’s capacity in its response to epidemics.
Specific: provide emergency support and strengthen the intrinsic capacity of the National Health Care System of São Tomé and Príncipe to prevent and control the COVID-19 epidemic in the country.

BENEFICIARIES

Direct: São Tomé and Príncipe’s healthcare professionals.
Indirect: São Tomé and Príncipe’s population.

BUDGET

€ 480,000

FINANCING

European Union and Camões, I.P.

PARTNER

São Tomé and Príncipe’s Health Ministry
FACTS AND FIGURES

- 250 rapid antigen tests delivered
- 1 automatic extractor essential for performing COVID-19 tests was delivered
- 6 haemodynamic monitoring equipment delivered
- 4 expatriate trainers involved in capacity building of São Tomé healthcare professionals
- 2 training courses "COVID-19: infection prevention and management" delivered, with a 112 hours duration
- 50 São Tomé healthcare professionals graduated
- 1 informative video produced and disseminated and 1,500 awareness-raising posters created and distributed

ACTIVITIES IN 2020

- Essential equipment and consumables to carry out COVID-19 tests delivered, enabling to multiply the diagnostic capacity in the country;
- Medicines and oxygen-therapy equipment delivered to ensure responsiveness in the treatment of COVID-19 patients;
- Protection medical supplies delivered;
- Medical missions carried out to the strengthening of the technical and assistance capacities of São Tomé and Príncipe's physicians, nurses and health technicians in the pandemic's management;
- Support provided to the national healthcare professional teams in the pandemic management: protocol drafting, containment zone and space management, patient and professional circuits, samples collection zones, equipment and healthcare personnel installed capacity and needs assessment;
- Production and dissemination of awareness-raising materials on prevention, symptoms and mask use (posters and video);
- Selection of 6 São Tomé physicians and nurses for a 3 months intensive training in Portugal on the COVID-19 prevention and treatment.
“The continuous training for secondary school teachers in São Tomé and Príncipe, promoted by PAISE-STP, is of great importance for the teaching-learning process in the country as it will provide teachers with innovative strategies and other competences that will help them face the sweet ordeal of training young people in this green land. The technical-pedagogical framework in the field, composed of a mixed team (cooperation and local agents), is an asset for the training project, since it allows to substantiate an intercultural ‘marriage’, a more fruitful interweaving between the technical-scientific-pedagogical components and aspects of the São Toméan reality and, consequently, the enrichment of the training programme itself”.

Helena Afonso, local agent/trainer and Portuguese Language supervisor (MEES)

“Working with the PAISE-STP team has been an enriching experience from a scientific, pedagogical and intellectual point of view. The competence, the accumulated experience, work and research capacity, the intellectual honesty and collaborative spirit of the team are attributes that we highlight and that we should explore (in a good way!) for the benefit of the São Tomé and Príncipe University development, namely in initial teacher training. We believe that this is a beneficial cooperation in order to find updated and adequate teacher training models for our reality”.

Beatriz Afonso, member of the organising committee of the Seminar “Training Teachers Today” (USTP)

“I have a very good and positive evaluation of this experience [distance learning with face-to-face tutoring], largely due to the teachers’ willpower to teach and help students achieve good exam results. The teachers’ helpfulness and continuous monitoring was fundamental, both for me and for all my colleagues. As it was a new situation for everyone, the first days were of adjustment for students and teachers alike. As time went by, we all adapted and everything went well. The amount of study material we received was of great surprise to me. And the teacher-student proximity was very important. This was a very good experience and, despite the distance, everything went very well. The teachers and students groups created on Facebook and Whatsapp were of great importance to support the study, clarify doubts and support the students.”

Esmael da Glória, 12th grade student at Padrão Secondary School, Autonomous Region of Príncipe

Our intervention reflects our commitment towards a development process that respects the liaison with national authorities and fosters local, individual and institutional skills. The most relevant action in this sector has been taking place in São Tomé and Principe, where our actions support the public authorities responsible for Education. In recent years, our actions have covered around 400 teachers and other education professionals and indirectly reached almost 20,000 students.

PAISE-STP Integrated Support Programme for São Tomé and Principe’s Education Sector
NOV 2019 – SEP 2022
SÃO TOMÉ AND PRÍNCIPE

OBJECTIVES
Overall: contribute to the improvement of the education sector in São Tomé and Príncipe.
Specific: contribute to raise the professional qualifications and skills of the secondary school teaching staff; promote the development of institutional capacities of the University of São Tomé and Príncipe (USTP) and the Ministry of Education and Higher Education (MEHE); and contribute to improving the education sector’s functioning, especially regarding school administration and management.

BENEFICIARIES
Direct: directors and technical staff from the MEHE central services; pedagogical supervisors; subject coordinators; school managers; education inspectors; secondary school teachers; USTP teachers involved in the initial teacher training; the USTP, Cabinet for Continuous and On-the-job Training; Directorate for Secondary and Technical-Vocational Education; Directorate for Educational Planning and Innovation; and the Education Inspection Office.
Indirect: participants of the initial teacher training for secondary school teachers, and secondary school students (grade 7 to 12) of São Tomé and Príncipe.

BUDGET

PAISE-STP
INTEGRATED SUPPORT PROGRAMME FOR SÃO TOMÉ AND PRÍNCIPE’S EDUCATION SECTOR
FACTS AND FIGURES

1 International seminar on Initial Teacher Training held

Equipment reinforcement to 3 USTP laboratories

Reinforcement with IT and reproduction equipment of 2 central services of MEES

4 national continuous training programmes designed and under implementation

280 secondary school teachers attending continuous training

3 MEES working groups supported by local coordination staff

1 dispatch and one draft legislation developed with the PAISE-STP support

150 copies of the Essential Learning delivered to teachers

9 classes of the Autonomous Region of Principe students taught by cooperation agent teachers

4 Autonomous Region of Principe teachers attending the on-going training pilot-programme

ACTIVITIES IN 2020

• USTP and the University of Aveiro joint organization of the “Training teachers today: sharing knowledge, experiences and challenges” seminar, held on November 26th and 27th;

• Integration of MEES Working Group, coordinated by the Directorate of Higher Education (DES), that is developing the Teaching Qualification Legal Regime proposal;

• Equipment acquisition and delivery to reinforce USTP’s Biology, Physics and Chemistry laboratories;

• Beginning of the functional diagnosis of USTP’s academic and administrative services;

• Hiring Teacher-trainers (8 cooperation agents and 5 local agents) to promote continuous training programmes for secondary school teachers and to provide teaching support in the Autonomous Region of Principe (RAP);

• Design and implementation start of 4 national continuous training programmes for secondary school teachers of Portuguese, Mathematics, English and Natural Sciences/Biology;

• Integration of MEES Working Group, coordinated by PAISE-STP, that drafted the dispatch for the adoption of Essential Apprenticeships in Portuguese Language and Mathematics;

• Reproduction and distribution of the Essential Apprenticeships in Portuguese Language and Mathematics to teachers;

• Equipment acquisition and delivery to reinforce the GFCE and DESTP;

• Permanent technical support to the GFCE;

• Integration of MEES Working Group, coordinated by IGE, that developed the legislation proposal on “Non-higher Education and Teaching Facilities Evaluation”;

• Teaching of Portuguese Language and Mathematics subjects in the Autonomous Region of Principe’s 12th grade classes by cooperation agents;

• Distance and face-to-face support in preparing 12th grade students for the national exams by the cooperation agents in the Autonomous Region of Principe (exceptional measure due to the suspension of regular classes as a result of the pandemic);

• Start of the on-going training pilot-programme in the Autonomous Region of Principe;

• 1st Strategic Monitoring Committee meeting prepared and held.
"I like raising animals and I raise many. I also raise chickens. I had problems with the chickens because they kept dying, but now we have found someone to help us with the vaccines. Now that they are giving the vaccines to the chickens, they are doing well, before they were dying and we didn’t know why, before we didn’t know which medicines we could give them, but since they started being vaccinated they are doing well. I believe that this could be good for other women and girls to start raising chickens. It’s a good thing because they can do chicken farming, not only for food, but also in economic terms, allowing them to make a better income than they would expect."

Adja Fati, beneficiary of the Ianda Guiné! Galinhas Action poultry vaccination campaign

"I am treasurer of the Nova Vida Cooperative, a fruit processing cooperative in the Blú Blú region of São Tomé and Príncipe, and last June I attended the “Agro-ecological Booklet” exchange. I believe that such exchanges are important, for us women, to reflect on our standing in society and on our fundamental role in the local region’s development. It was a good experience, a great surplus value, in which I was able both to share knowledge and to get to know the experience of companions from Angola, Brazil, Mozambique, Guinea-Bissau as well as São Tomé and Príncipe. All the experiences were good, but what struck me most was the application of the agro-ecological booklet, an apparently simple tool, but one that has become a great asset for the empowerment of rural women. In general, several learnings from this exchange are already being applied in my cooperative, namely the use of the Agro-ecological Booklet."

Anitilza Tebus, “Agro-ecological Booklet” exchange session participant

"What I most enjoyed about this year’s [Value Chain MOSAP II] project was having contributed to the training of technicians from the Agricultural Development Stations. This training was held in all of Huambo province’s municipali- ties and strengthened, to a certain extent, the Agricultural Development Station tech- nicians’ position amongst our farmers. I believe that so far, the highest point of my work in the project has been talking about the crop technologies of beans, corn and potatoes and passing on the knowledge that I have acquired over all these years to these technicians who work directly with the peasants, our farmers."

Hélio Tiago, junior agronomic engineer, Huambo
OBJECTIVES
Overall: contribute to the sustainable development of the Urok Islands Community-based Marine Protected Area (CMPA).
Specific: promote the improvement of socioeconomic conditions and supporting the joint management and participatory governance of cultural and natural resources.

BENEFICIARIES
Direct: 185 farmers households; 114 women producers of vegetables; 77 women producers of solar salt; 163 resident fishermen; 125 young local producers/merchants of palm oil; 100 women in small businesses; 20 young entrepreneurs; 300 students and 15 teachers of Urok community schools; and 134 members of management bodies in the Urok Community-based Marine Protected Area (CMPA).
Indirect: local administrative authorities and regional authorities from Bolama-Bijagós, who will be engaged in the participatory management process; and the population of Urok and the archipelago, especially young people.

BUDGET
€ 932,302

GLOBAL ACTIVITIES

- Training and support to 113 farmers in **ecologically based production** of the main food crops;
- Producers’ capacity building for the **production and transformation of local products**;
- Fostering **fruit and vegetable surplus integration** in the production chain and economic valorisation;
- Support and capacity building of 102 fishermen in responsible fishing techniques;
- Individual and community **micro entrepreneurship** initiatives support in the **agro-food sector**, including trading and product transformation;
- “**Socially Responsible Tourism in the Urok Islands, Guinea-Bissau**” case study published with the aim of guiding the options for promoting responsible tourism in the region;
- Intervention to **improve water access for both consumption and agro-food production**, through the construction of 26 water sources;
- Implementation of a regular **garbage collection and treatment system** in 33 “tabancas”;
- Teacher qualification in **school management** area;
- Conducting **COVID-19 information and awareness campaigns**;
- **Nago Health Centre’s** rehabilitation and equipping;
- 4 **community schools** rebuilt and equipped;
- Quality improvement of initial computer education and training through a **Computer Centre construction and operationalisation**;
- Community Protected Marine Area (CPMA) Management Committee regular functioning support, which was internationally recognized by the **UN Development Programme (UNDP)** with the 2019 **Ecuador Award**;
- Support to **auditing and coordination missions with local entities**, with an average of 48 missions per year.

FACTS AND FIGURES

- 6 awareness campaigns (sanitation)
- 102 fishermen trained
- 1 development proposal for a responsible tourism in Urok
- 4 community schools rehabilitated
- 1 Health Centre rehabilitated
- 1 Information centre built
- 26 drinking water sources constructed
OBJECTIVES

Overall: contribute to food and nutrition security in the target regions of Guinea-Bissau, through the provision of foods of animal origin (chicken and eggs).

Specific: contribute to the structuring of the poultry industry in Guinea-Bissau, promoting opportunities for socio-economic development.

BENEFICIARIES

Direct: local micro, small and medium-scale community or family businesses; poultry professionals (individuals, companies, and associations); production centres and their associates (universities, research centres, agricultural producers, etc.); technicians of the participating State institutions; and veterinarians and para-veterinarians.

Indirect: the population of the target regions, in particular women.

FACTS AND FIGURES

- **21** poultry farmers graduated from the technical poultry farming course
- **11** participants, from the General Directorate of Livestock, graduated in poultry farming
- **16,092** birds vaccinated in **6** regions of Guinea Bissau
- **166** poultry farming families supported (vaccination of their birds and delivery of masks)
- **2** Guinean poultry companies supported with grants

ACTIVITIES IN 2020

- **A poultry farming course** for technicians from Guinea Bissau’s General Directorate of Livestock, on poultry feeding and health issues, was held in February;
- **Visits** to the action’s supported poultry farms in order to identify and solve the main existing sanitary problems and to define the intervention areas for vaccination campaigns against Newcastle disease and avian influenza;
- **Promotion of a vaccination campaign** in the 6 target regions of the Action, during the month of May, which allowed the vaccination of 10,956 birds and the support of 166 poultry farmer families;
- **The 1st training course in poultry farming for Guinean breeders and entrepreneurs**, was held between February and March, in which 21 poultry farmers were formed;
- **Creation of a survey system** for poultry farmers’ weekly monitoring integrated in the Action, through the data collection tool KoBoToolBox;
- **Meetings held to diagnose** the Poultry Chain Producers’ Union (UPCA) and the Paravetarians Association of Ingoré (APAI) current situation in order to strengthen associationism within the poultry farming and animal health areas;
- **Construction of a new poultry farm**, for CEDAVES and Piu Piu Awara companies, with the aim of significantly improving the efficiency of the existing poultry farms, by increasing egg production and improving the production of raw material for animal feed production;
- **Vaccination of 5,136 birds** from the CEDAVES and Piu Piu Awara poultry farms companies.
OBJECTIVES

Overall: contribute to good multi-actor governance in the area of food security and nutrition and in promoting sustainable and inclusive development in São Tomé and Príncipe, as well as contributing to the fulfilment of the Human Right to Adequate Food and Nutrition.

Specific: strengthen the participation and capabilities of civil society for discussing and monitoring the implementation of public policies that impact on natural resources' access and management, on poverty reduction, and on food and nutrition insecurity.

BENEFICIARIES

Direct: 30 technical leaders of civil society organisations; 20 managers and technicians of agricultural cooperatives and family farmer’s organisations; 30 farmers, artisanal and extractive fishermen (in particular, young people and women); 46 managers and technical officers of national public administration and the Autonomous Region of Príncipe, in the food security and nutrition sectors; and 50,000 people, mostly young people and poor women living in rural areas.

Indirect: the population of São Tomé and Príncipe, estimated at around 190,000 residents.

* Component 2 of the “Family Farming and Marketing Project” (MOSAP II)
FACTS AND FIGURES

13 new production sub-projects approved

45 commercial partnerships in the 3 provinces (Bié, Huambo and Malange)

19 commercial transactions with informal sector companies representing 1,045 t of products sold, benefiting 1,114 direct and 8,000 indirect producers with a value of 200,666,450 kz

3 agricultural warehouses built

82 technicians from the Agricultural Development Stations (40 Huambo and 42 Bié) trained in crop and pest control techniques

75 technicians from the Agricultural Development Stations trained in event animation and agriculture as a business

ACTIVITIES IN 2020

- Preparation and follow-up of irrigation sub-projects support through information gathering from beneficiary registration forms and agricultural perimeters, including the cooperatives and land legalisation processes monitoring;
- Support for the development of investment proposals for production projects, including improving producers’ access to input supply services, the use of irrigated perimeters and the dissemination of messages by extension services;
- Support for the sub-projects production implementation of vegetables, beans, maize, rena potato and manioc (cassava/yucca), through the technicians training of the Agricultural Development Stations (EDA) and Field School trainers (ECAS) in crops and pest control, and through the support of seed multiplication and conservation sub-projects;
- Collecting data and information on agricultural trading, with a focus on maize and vegetables, drafting sub-projects with the Producers’ Service Centre and updating agribusiness company databases;
- Support for the preparation of value chain sub-projects at a trading, storage, processing, marketing and technology transfer level;
- Value chain sub-projects implementation: technical assistance for post-harvest treatment, cost information diffusion, linkage facilitation between producers and agribusiness companies, and storage bags distribution;
- Planning and agreement meetings between the Provincial Implementation Units of the project in the 3 provinces;
- Capacity building for the sub-projects implementation: community animation, agribusiness and cooperativism training and formative material development.
The empowerment of civil society is crucial for the development of fairer, more democratic and peaceful societies and consequently, also to statebuilding. The promotion and support of civil society activities, especially NGDOs, citizens’ organisation platforms and other non-state institutions, therefore reflects a cross-cutting concern of our action in several countries. Most of our projects have been implemented in Angola, Mozambique, Guinea-Bissau, East Timor and Brazil.

Ianda Guiné! Djuntu
Promoting the Inclusion of Children and Young People with Neurological Disabilities

OVERCOMING the Pandemic in the Santo Antão, São Vicente and Maio Islands

TESTIMONIALS

“I think it is us, the young people, who should take charge of solving our community’s problems and not stand back and wait for other organisations to solve our problems. With the COVID-19 outbreak, we decided to organise and mobilise resources to help in the process of preventing and fighting the pandemic. We asked the Ianda Guiné! Djuntu Action for support, which in the first phase offered us baions, soap and bleach to distribute at different strategic points in Bissorã city. With the COVID-19 Fund financing, we were able to buy sound equipment, which we used to raise awareness among people in the neighbourhoods and especially in the markets. It was a good experience, I felt that we took part in solving a problem in our community. We are young people and our mission should be to serve our country.”

Sirem Baio, Network of Youth Associations coordinator of the Bissorã sector

“I hope this training [in entrepreneurship and small business management for mother carers] will help me, because I want to reopen my pastry business. I am a mother of two disabled children, the eldest, called Ailton, lost his hands when he was two years old, he has now turned 27 and he’s going to graduate. And I have another one, Ivan. He’s got hearing and speech problems and he attends the Colmeia association. My business started to collapse because Ailton fell ill in sixth grade and because I also fell ill, they told me that a vein in my brain had burst, so I couldn’t work any more, my money ran out and I couldn’t set up my business. But now, I have been given this support, with this training I am confident that I will take my life forward. This training is giving me more strength because it is showing me how to run my business, how to react and how to economize.”

Cesaltina Ramos, training beneficiary of the Promoting the Inclusion of Children and Young People with Neurological Disabilities project
JAN 2019 – DEC 2023
GUINEA-BISSAU

OBJECTIVES

- Equipment acquisition for the faceshield’s production training addressed to youngsters;
- Holding of coordination and work-planning meetings.

FACTS AND FIGURES

1 social mask production training course held
80 social masks produced
2 coordination meetings held
TESTIMONIALS

“The Pro-Carreteras Committee arose from the community’s need to improve the access road, which was in a critical state and is the only access route to the communities of Luz de La Esperanza, Patagonia and Semillas de Paz. We then decided to team up to take sole charge of this issue. We managed to improve the road with the effort of the whole community. It has been very positive for us and of great benefit to the community. We are very grateful to the project [Sustainable Territories for Peace in Caquetá] and we are sure that much help and improvement will come to our region. We had never received such great support as we did from the project.”

José Ariel Perdomo, Pro-Carreteras Committee Chairman, La Montañita

“All I ever wanted was to be a boss. As a young Gambian woman, the journey to turning my dream into reality has not been an easy one but I felt agriculture was the only way to making that dream happen. I would like to thank the entire IMFV team through the "Tekki Fii [Building a Future: Make it in the Gambia Project]" for the support they have provided for me to make this dream a reality. It might have been impossible to do without the Tekki Fii agro grant which enabled me to expand my garden and productivity. Now I believe it is my responsibility to take part in the agricultural value chain to provide healthy and fresh vegetables to the market and empower the youths and women of my community in sustainable development through job creation. A special thanks to European Union for funding the project.”

Jalika Keita, Founder Mansaring Farm and Tekki Fii Agro grant beneficiary

MIGRATION, POST-CONFLICT AND HUMANITARIAN ACTION

Forced migrations, as well as waves of refugees and of internally displaced people continue to pose a serious threat to peace and human dignity, to which multilateral institutions, national authorities and civil society organisations try to respond. These phenomena, that frequently occur or result in cases of high institutional fragility, have been addressed by our action, usually in countries on post-conflict situations. Angola and Mozambique are some of the countries where we work.

Sustainable Territories for Peace in Caquetá
Tekki Fii - Building a Future: Make it in the Gambia
OBJECTIVES
Overall: contribute to the consolidation of a stable and lasting peace in Colombia through the strengthening of socio-economic and environmental development in the Amazonian territories in the post-conflict period.
Specific: together with the Colombian government, territorial entities and social organisations, promote the improvement of local capacity for the production, processing and marketing of fine and flavour cocoa and by-products in a profitable and competitive way, in territories affected by the armed conflict, and guided by the principles of environmental conservation, social inclusion and the consolidation of a culture of peace and legality.

BENEFICIARIES
Direct: 2,500 beneficiaries of the productive, social, reincorporation and infrastructure components.
Indirect: 6,500 beneficiaries of the productive, social, reincorporation and infrastructure components as well as their families and communities.

FACTS AND FIGURES

30 Civil Society Organisations supported in strengthening their organisational capacities

30 Financial Supports to Third Parties granted

297 farmer families receiving technical assistance, production factors and agricultural equipment

175 environmental conservation compacts (1,016,45 HA) signed

53 cocoa producers undergoing organic certification

54 training actions

3 factories built: cocoa processing, non-wood forest products and essential oils extraction

4 cocoa processing centres built

ACTIVITIES IN 2020

- Technical assistance to producers in the following chains of production: cocoa, coffee, sugarcane, non-wood forest products (particularly canangucha) and fruit, on good crop management and post-harvest practices;
- Delivery of agricultural production factors and tools;
- Holding of capacity building actions aimed at strengthening transformation processes and adding value to the production of chocolate, vegetable oils and cosmetics made from essential oils and fruit pulps;
- Dissemination of agro-environmental practices that seek soil recovery and conservation;
- Organic certification of 53 cocoa producers;
- Attendance of the Chocoa Trade Fair in Amsterdam;
- Infrastructures construction (productive and social);
- Reinforcement of 30 civil society organisations, in administrative, financial, legal, socio-entrepreneurial and organisational matters;
- 4 interchanges were held for knowledge and experience sharing;
- Relationship strengthening between indigenous and rural communities;
- Dialogue and reconciliation promotion between former FARC-EP combatants and the neighbouring communities, contributing to the reconciliation, destigmatisation and reintegration of former combatants;
- Rehabilitation of remote access roads to beneficiary communities;
- Community broadcaster supported through the production of the fortnightly programme “Voces Caqueteñas para la Paz”;
- Alliances established with the National Colombian Army’s Engineers Battalion and a private Portuguese company (Mota-Engil) for road rehabilitation.
OBJECTIVES

Overall: contribute to socio-economic development and to foster opportunities for local populations and returning migrants in The Gambia, namely in Central River, North Bank, Lower River and Upper River regions.

Specific: to boost economic development though fostering employment and income generation opportunities; and improve the attractiveness of rural areas and promote a favourable socio-economic environment for an effective and sustainable reintegration of former migrants.

BENEFICIARIES

13,000 people in rural areas, in particular women and youth.

BUDGET

€ 5,000,000

FINANCING

European Union Trust Fund for Africa

PARTNERS

Camões, I.P., Agency for the Development of Women & Children (ADWAC), Alianza por la Solidaridad, United Purpose, International Trade Centre, Enabel and GIZ
FACTS AND FIGURES

2,754 women supported for the development of horticultural activities (allocation of seeds and capacity building in financial management)

154 chilli pepper producers supported at a marketing level

141 young people, including 40 returning migrants, trained in business development and financial management

33 youths supported with inputs and equipment for the development of agro-business activities

25 community radio technicians trained in management and journalism

50 primary and secondary school teachers trained in agri-business topics

25 school gardens supported with seeds and equipment

41,000 masks distributed to primary and secondary school students and at community level

ACTIVITIES IN 2020

• In-kind financial support to rural agro-entrepreneurs to create new businesses or strengthen existing ones;

• 5 training courses held on business development and financial management aimed at (existing or potential) agro-entrepreneurs;

• Capacity building for the improvement of production techniques and seeds and small tools distribution within the framework of a savings plan aimed at community gardens;

• Support for the setting of 2 agro-processing raw materials centres (one in Illiassa, North Bank Region and the other in Nyagen, Central River Region);

• Support for the setting up of 2 multipurpose income generation centres (one in Nyagen and one in Janjanbureh, Central River Region);

• Support for market linkages establishment, both national and international, of chilli and onion producers;

• Technical capacity building for 5 community radio stations, namely through 2 management and journalism training courses for community radio technicians and through equipment distribution;

• Implementation support for the Annual Inter-School Athletics Tournament;

• Two agro-business training courses for agriculture teachers in 25 primary and secondary schools;

• School vegetable garden support supplies distribution, such as seeds, tools, fencing material, etc;

• Support supplies distribution for schools reopening in the COVID-19 context, such as masks, hand-washing mobile stations, soap, first-aid kits, etc.;

• Implementation of 8 community-based COVID-19 prevention campaigns led by youth groups.
Testimonials

“As a young entrepreneur, the project [Solidarity and Community Tourism in Maio Island] had a great impact both for my life and for Maio Island, contributing to the stationary and computer services provision market expansion. Through the entrepreneurship trainings, I gained fundamental knowledge to better manage my firm. With the project funding, I had the opportunity to strengthen my business, thus increasing my income. Despite the pandemic context in which we live and also taking into account the competition, I have been conquering my position in the market and managing to benefit from my enterprise. I therefore consider the project to be of great importance”.

Aleida Oliveira Reis, Figueira’s young entrepreneur

“As a fishmonger myself, I consider the project [Community and Solidarity Tourism in Maio Island] to be of great importance. Since the beginning of its implementation, through training, we, the fishmongers of Calheta, have learned fish processing and preservation techniques never before seen in our village. We learnt techniques to take better advantage of the fish, as it’s not every day that our fisherman are rewarded with a good day’s catch. This project has brought alternatives and solutions for the days or seasons when fish is scarce. Through this project, fishing, being one of the main economic activities of the Maio Island, mainly in the village of Calheta, will gain other forms for its commercialisation, by providing it in accordance with the desires and needs of each person, whether they are residents, national or international tourists, who frequently visit our beaches in search of the “peixe di Maio”.

Doroteia Martins dos Santos (“Mana”), fishmonger at the Fish Processing Unit in the Calheta village

Environment and Sustainability

The preservation of ecosystems, biodiversity and non-renewable natural resources, as well as the fight against climate change, have been the focus of our action in this area. We have developed water supply and quality improvement projects, sanitation and hygiene, feasibility studies for capturing and better use of resources, amongst others, aiming to strengthen public entities and engage local communities in the countries where we intervene, particularly Cape Verde, Guinea-Bissau and São Tomé and Príncipe.
OBJECTIVES
Overall: the improvement of the living standards of the population in the Maio Island, through solidarity and sustainable tourism.
Specific: strengthen and diversify the tourist offer in the Maio Island, by increasing income generating activities linked to solidarity and sustainable tourism and by promoting participatory techniques.

BENEFICIARIES
Direct: local and community associations of the Maio Island, board members, associates and family members; professionals of traditional economic activities and rural population (with particular focus on women and youth); farmers, livestock farmers and other traditional activities; association of cheese producers from Ribeira Dom João; municipal technical officers; associations and the Boavista Municipality.
Indirect: population of the Maio Island and visitors.

**FACTS AND FIGURES**

- 3 houses improved and adapted for use as guest houses
- 3 community kitchens renovated and equipped
- 4 fishmongers trained
- 141 members of community organisations trained
- 78 young people trained in social innovation
- 12 municipal technicians trained
- 4 pens built and 10 goats purchased
- 1 greenhouse installed
- 2 recreational boats built
- 6 COVID-19 prevention campaigns carried out

**ACTIVITIES IN 2020**

- **Houses adaptation/improvement works for guest house tourism**;
- **Support of grogue producers** (a typical Cape Verdean drink) in complying with the hygiene and safety rules required by the authorities (material delivery and carrying out small works in production units);
- **Carrying out training and technical follow-up for women fishmongers** to produce canned and smoked fish;
- Rehabilitation and equipping of **community kitchens** continued;
- **Conducting capacity building training** targeting members of community organisations and contest launching for Third Party Support targeting Civil Society Organisations;
- **Coaching sessions** developed targeting young people from 13 locations on the island;
- **Customer service techniques training**, held for the Maio City Hall technicians;
- **Beginning of the Cheese Route** brochure drafting and the production of the promotional film for the Maio’s touristic routes;
- **Selection and start of 4 projects for Third Party Support: Youth Entrepreneurship** and launch of the Third Party Support contest Civil Society Organisations;
- **Completion of the participatory budgeting** activity in the Fontona neighbourhood in the City of Porto Inglês (changes resulting from the COVID-19 pandemic);
- **Carrying out awareness-raising actions for preventing the spread of the COVID-19 pandemic.**
Municipalities and Local Authorities

Local authorities and particularly municipalities are key actors for statebuilding and development. Our actions aim to contribute to the institutional strengthening of public institutions in the countries where we intervene, as well as to the participation of citizens in public affairs. The projects held and in which we have participated in recent years are located in Guinea-Bissau, East Timor, Angola and Cape Verde. In Portugal, we have been working in partnership with a network of municipalities.

ACCIONAD-ODS
Towards 2030
People and Planet: a Common Destiny

Testimonials

"Under the Towards 2030 project, I had the opportunity to consolidate knowledge and benefit from the support of IMVF technicians for awareness-raising actions and training on municipalities and the SDGs. The work methodologies that we have acquired, from the trainings in which we participated, were a very positive reinforcement to increase our skills as promoters of the Global Agenda. The training support materials, provided by the IMVF trainers, are very important tools for the SDGs implementation in the various organizations with which we work in the process of the 2030 Agenda dissemination in order to contribute to the Sustainable Development. The fact that the work actions were promoted by very creative and with deep knowledge of the theme professionals, allowed us to organize targeted activities for different audiences, inside and outside the City Council, taking the SDGs to the community in general. From a professional and personal point of view, it was a very enriching experience."

Maria Helena Palacino, Seixal City Hall senior technician and trainings attendee of the Towards 2030 project

"The ACCIONAD-ODS project relates to its partnership the same way the SDG relates to humankind; a constant challenge, the imperative need for a collective strategy, which requires adaptation measures, overcoming and reorganisation, and which implies, not just looking at past problems with a focused eye on the future, but in which it is also clear that we will only get far if we walk together."

Artur Filipe Gregório, project coordinator at In Loco Association, partner of the ACCIONAD-ODS project
OBJECTIVES

Overall: Improve communities’ ability to achieve the goals of SDGs 11, 12 and 13 through coordinated actions by local authorities and civil society organizations.

Specific: Improve the capacities of administrations and public organizations in basic resource management (SDG11); increasing citizen participation and its political impact through the promotion of projects in the areas of production and consumption, implemented and managed by social entities and civil society (SDG12); and improve the articulation of cross-border space through environmental projects promoted by social economy entities and local governments (SDG13).

BENEFICIARIES

Municipalities of Alentejo and Algarve (technicians and municipal leaders), Civil Society Organizations (CSOs) and other social entities.

BUDGET

€ 172,709 (Global: € 1,068,268)

FINANCING

European Union (INTERREG VA – Spain-Portugal POCTEP)

ACCIÓNAD-ODS

ACTIONS TO ACHIEVE THE SUSTAINABLE DEVELOPMENT GOALS THROUGH THE PARTICIPATION OF LOCAL ACTORS: A TERRITORIAL APPROACH

MAY 2019 – AUG 2022

PORTUGAL

(Alentejo and Algarve) and Spain (Extremadura e Andalusia)
FACTS AND FIGURES

1 "Sustainable Municipalities and Climate Change" webinar with 55 participants
1 SDG trainers’ training course underway in Spain
1 SDG trainers’ training course under preparation in Portugal
2 webseries on sustainable consumption and production, with 2 episodes each, are being recorded in 2 countries
11 project monitoring meetings

ACTIVITIES IN 2020

• Project monitoring partners’ meeting participation on February 27th, in Mérida;

• Development of a collaborative action platform on the SDGs, driven by trans-regional local government networks;

• Terms of Reference drafting and dissemination for:
  a) a web-series production (with 4 episodes) on good sustainable practices in the Alentejo, Algarve, Extremadura and Andalusia regions;
  b) carrying out a trainers’ training course (with 2 editions) on the SDGs addressed to associations and municipalities technicians from Alentejo and Algarve.

• Entities selection to produce the webseries and promote the trainers’ training, as well as holding preparatory meetings with both;

• Beginning of the webseries recordings and of the preparation of the trainers’ training actions;

• "Sustainable Municipalities and Climate Change" webinar participation on December 10th, organised by the FELCODE and FAMSI partners.
SEP 2019 – AUG 2021
PORTUGAL

OBJECTIVES
Overall: promote ‘glocal’ policies for sustainable and inclusive development and ensure citizens’ mobilisation and active engagement in support of the SDGs.
Specific: reinforce the role of 22 Portuguese municipalities in the promotion of Development Education and Global Citizenship and sustainable development, in order to contribute to citizens’ understanding about the importance of local action for achieving the SDGs, and to encourage them to act for fair and sustainable global development.

BENEFICIARIES
22 Portuguese municipalities, 220 municipal technicians and policy makers (150 women and 70 men), 1 million citizens, 35 local and national media organisations, and 22 local Civil Society Organisations.

BUDGET
€ 193,886

TOWARDS 2030
CAMPAIGN FOR THE PROMOTION OF SDGS AND DEVELOPMENT EDUCATION AND GLOBAL CITIZENSHIP EDUCATION
FACTS AND FIGURES

1 study on Municipalities and SDGs drafted and released

2 manuals “ABC of Sustainable Development Goals” drafted and released

5 training blocks on the 2030 Agenda’s location developed and promoted

4 training sessions for 69 municipal technicians with + 25 hours duration

1 training session for + 40 teachers with a 3 hour duration

1 awareness-raising action for 21 municipal decision-makers

8 campaigns on the 2030 Agenda defined by 8 municipalities, 4 of which have already been implemented and disseminated

ACTIVITIES IN 2020

• Drafting and publication of the study “Towards 2030: Municipalities and the Sustainable Development Goals”, which provides a foundation for Portuguese municipalities to integrate the SDGs into their local contexts and have an effective impact on global transformation;

• Drafting and implementation of 2 national training plans: one for municipal technicians and the other to teachers, which allowed structuring the training block used in the training sessions aimed at both target audiences;

• Co-organisation of the seminar “Municipalities Towards 2030: Challenges and Opportunities for Sustainable Development”, March 6th, in the Seixal Municipal Auditorium;

• Drafting and publication of two versions of the manual “ABC of Sustainable Development Goals”, one targeting local authorities and the other the school community;

• Development and promotion of training blocks on the Agenda 2030 localisation process;

• Awareness-raising structuring and promotion of actions on the 2030 Agenda aimed at municipal decision-makers and technicians;

• A teachers training session structuring and promotion, in partnership with the Schools Training Centre of the Municipality of Seixal, on September 15th;

• Website development (www.rumoa2030.pt), updated with resources and news on the project;

• SGD’s awareness-raising material conception, production and distribution about the SDGs;

• Support to SDG’s awareness-raising campaigns definition and implementation by the municipalities involved in the project;

• Online session participation on the key role of local and regional governments in achieving Agenda 2030 in the framework of the 18th European Week of Regions and Cities, on October 5th;

• Joining the Action for Sustainable Development Campaign.
OBJECTIVES

Overall: to promote sustainable development policies at glocal level and ensure an active participation of young citizens as actors of change and mobilisation to combat climate change and for the sake of the Sustainable Development Goals (SDGs), through the promotion of sustainable lifestyles, behaviours and habits.

Specific: contribute to the awareness, critical thinking and mobilisation of young people in the European Union on the climate change challenges by promoting changes to practices and policies at the local level, in coherence with global sustainable development; as well as to strengthen the local authorities, municipal associations and civil society organisations role as key actors in promoting sustainable development and as agents of change in the context of climate change.

BENEFICIARIES

Young European citizens aged 15 to 35, municipal technicians and local policy-makers.

BUDGET

€ 1,243,609 (Global: € 6,714,846)

2 bilateral meetings with FUEL to prepare the corporate identity
4 bilateral meetings with partners
4 meetings between the IMVF and the Municipality of Loures to prepare the partnership agreement
1 financial management manual drafted

ACTIVITIES IN 2020

• Participation in inception seminars of European Union co-financed projects support, organized by DEAR Support Team, on September 15th, 17th, 22nd and 24th and October 6th;
• Partnership agreement signed between the IMVF and Loures Municipality;
• Bilateral meetings held between the IMVF, Loures Municipality and the project partners;
• Hiring of the project’s coordination team and financial support technician;
• Partnership agreements preparation between IMVF and each partner;
• Design of the project’s corporate identity by FUEL;
• Project launch meeting set-up;
• Project’s financial management manual drafting.
TESTIMONIALS

“For me, The TAS Migration Labs project has been an important space for sharing and learning, where I have questioned some certainties that I took for granted. This questioning has been undertaken not only at a social level, namely regarding the unequal distribution of society, but also at a much personal level, namely in the deconstruction of prejudices and acknowledgement of privileges. It has been a very instructive and educational process for me, where I have come to meet very different realities and experiences from those to which I have always been accustomed. This scenario’s confrontation has had a very positive impact on the way I see the world and the way I shape my actions in it. I feel a more active and aware citizen”.

Mariana Álvares, WorkLabs participant of TAS Migration Labs project

“Within my SDG, which is the SDG14 - Protect Marine Life, I thought of returning to my homeland, to the city where I was born and clean our river that is quite polluted. We tried to remove the rubbish from the banks and that which is on the surface of the water so that it is not swallowed by fish and so that even the birds that live on the banks do not die from swallowing some residue. Although short, considering what needs to be done, the 4 clean-up actions went very well, yet it was quite a good help. I believe that, with all the teams and projects that are being done in this area, and in many others as well, we can have in the future a much cleaner river and completely meet the goal.”

Patricia Alves, SDG Generation project young activist

1 survey developed and disseminated
1 Lisbon Talk and 2 Lisbon Speed Talks co-organised with 3,310 visualisations
+ 32 participants in the thematic workshop on Policy Coherence for Development
4 advocacy meetings promoted

ACTIVITIES IN 2020

- Launch of the “Portugal and the Global Development” survey, in December, with the purpose of analysing the knowledge, perceptions and opinions of the Portuguese people on global development issues;
- Co-organisation of the Lisbon Talk “European Challenges of Cooperation under the Portuguese Presidency”, on November 6th, with the participation of MEPs Carlos Zorrinho, Paulo Rangel and Marisa Matias. Cooperation, aid, migration and partnerships featured prominently and served as the main thread of the conversation;
- Co-organisation of the Lisbon Speed Talk “2021, what changes in inequalities?”, on November 25th, with Pedro Conceição, Head and Lead Writer of the Human Development Report Office of the United Nations Development Programme (UNDP) and moderation by Ana Isabel Xavier, Professor at the Universidade Autónoma de Lisboa;
- Co-organisation of the Lisbon Speed Talk “2021, what changes in Development Cooperation?”, on December 2nd, with Jorge Moreira da Silva, Development Cooperation Head of the OECD and moderation by Teresa Almeida Cravo, Professor at the Faculty of Economics of Coimbra University;
- Promotion of a thematic workshop on Development Policy Coherence at the II Development Education Seminar, on October 17th;
- Promotion of the project website (Coerência.pt) with news and updated reports on the project’s themes;
- Launching of the Portuguese version of the Guide to Policy Coherence for Sustainable Development produced by CONCORD;
- Holding advocacy meetings with political decision-makers and ministerial technicians;
- Reinforcement of the petition project to the National Assembly for the establishment of a “Global Development National Day”.
Strategic and Development Studies

The current phase of acceleration and widening of global changes led to the establishment of a strategic and development studies area, which brings a new dimension of think tank analysis to the IMVF’s regular activities, focusing on relevant issues that impact on Development and Cooperation. We have elaborated and published several studies and research papers/briefs, and we prioritise partnerships with various stakeholders — this has led to the creation of the Lisbon Club in 2016 and the Lisbon Conferences on global development issues in 2013, of which IMVF is a founding member.

Testimonials

“I attended the Lisbon Speed Talk on the US elections. I found the widespread use of postal voting interesting given the pandemic situation. It was important to understand the increasing mobilisation to vote since 2016, at a time when we are living in uncertain times, with political poles further and further apart”.

Leticia Marta, press officer at the PR and consulting agency Marco

“The Lisbon Conferences hold an unavoidable space for reflection in Portugal. The importance of the debate held in 2020 on global change acceleration and the impacts of the pandemic have proven it. It is an unavoidable theme. Congratulations on your choice.

Carlos Branco, Major-General and Researcher at IPRI-NOVA

“With contemporary themes adapted to the times we live in, the Global Challenges training course featured outstanding speakers, who deepened my knowledge on topics such as pandemic, nationalism and cybersecurity. To be recommended, to become acquainted with and tackle the main global challenges.”

Mafalda Infante, International Studies Master’s student at ISCTE-IUL
Despite being affected by the pandemic consequences, the 2020 activities of the Strategic and Development Studies Office (GEED in portuguese), were targeted to: (i) carry out activities and publications that contribute for increasing knowledge and debate on relevant issues of Sustainable Development and International Cooperation; and (ii) promote the Institute’s visibility and profile in the Portuguese society, including for new audiences and new activity areas, and using partnerships and cooperation with other institutions whenever appropriate, in particular with the Lisbon Club, for which the IMFV is the Headquarters and a founding member.

In 2020 GEED’s focused on carrying out partnership activities with third parties, namely: (1) Conferences, with emphasis on the 4th Lisbon Conference, in collaboration with the Lisbon Conferences’ founding entities; (2) Training, with emphasis on the 6th Global Challenges Summer School, in collaboration with ISCTE-IUL; and (3) Other activities, namely in support to the Lisbon Club for the organisation of 20 Lisbon Speed Talks and 3 Lisbon Talks.

CONFERENCES
The IMFV’s participation in supporting the Lisbon Club (as well as to the founding entities of the Lisbon Conferences project) was headed by GEED in the preparation and holding of the 4th Lisbon Conference on “The acceleration of Global Change - and the pandemic impact” which, for the first time, took place entirely online, from September 29th to October 1st. The conference was held under the high patronage of the President of the Republic.

The 7th World Press Photo Conference on Geopolitical Trends in the Pandemic Context was also held, in partnership with Maia City Council (these conferences have been co-organised with the IMFV since 2013).

TRAINING
As a result of the Cooperation Protocol signed in 2015 with ISCTE-IUL, the 6th Summer School on Global Challenges was held in the last week of September to analyse and debate global opportunities and threats. For the second consecutive year, the IMFV held an exhibition on the Sustainable Development Goals (SDGs), which was on display during that week in the auditorium lobby where the course was held. GEED has also worked with the Global Citizenship Unit to enable the contracting of IMFV to provide specific training on the SDG’s to teachers and students of ISCTE-IUL.

Two lectures were held: the first on Sub-Saharan Africa conflicts, on February 13th, to the Promotion to General Course, and the second on Conflict Typology in Africa, on October 20th, to the African Studies Course. Both lectures were held at the Military University Institute (IUM).

On January 14th, a lecture on Security and Development in Africa was presented to the National Defence Auditors Course at the National Defence Institute (IDN).

OTHER ACTIVITIES
Within its support for the Lisbon Club, the IMFV collaborated in the organisation of 3 Lisbon Talks, on Football and politics in the global context; European challenges of cooperation under the Portuguese presidency; and War in Ethiopia: regional and global implications.

It also collaborated in the organization of 20 Lisbon Speed Talks, all of them online, in which the following themes were addressed: (1) Post-COVID-19 human mobility future; (2) European responses to the crisis; (3) Impact of German Constitutional Court decisions on the EU; (4) Brazilian political dynamics; (5) Jihadism in Northern Mozambique; (6) Post-Brexit: what now?; (7) Political dynamics in Spain; (8) What happened to coups d’état in Africa?; (9) Russian foreign policy; (10) Political developments in Angola; (11) Africa & Europe: between aid and strategy; (12) European Union and China; (13) Jihadism in the greater Sahel; (14) Elections in the USA; (15) Transatlantic relations: what future? (16) India, a new global power?; (17) 2021, what changes in inequalities; (18) 2021, what changes in cooperation; (19) 2021, what changes in geo-economics; (20) 2021, what changes in geopolitics.

All Talks had wide dissemination in social networks and their results were subject of report in several social media channels. Both in the promotion and in the visualisations, the IMFV’s support was always mentioned and the respective logo was displayed.
Throughout the year, 4 papers were edited and published on the website, all written by the area coordinator.

Three of them, as IMVF Briefs, namely:
(1) Cabo Delgado: Jihadism “new war” or popular uprising?
(2) How to avoid the aid trap in the AU-EU Relationship.
(3) Pandemic, the myth of African exceptionalism.
A 4th paper, in the form of IMVF Policy Paper, namely:
(4) About the Pandemic, Development Cooperation and Europe-Africa Relations.

Two summaries of the Lisbon Talks were also published on the IMVF website: Football and Politics in the Global Context, and European Challenges of Cooperation under the Portuguese Presidency.

4 | Session “Africa in COVID-19 Times” by the International Studies Centre of ISCTE-IUL

5 | Training Workshop “The Delegated Cooperation under analysis: goals, tools and actors” by the Portuguese NGO Platform

JUL

15 | IV Forum of the Didactics and Technology Research Centre in Trainers’ Training (CIOTFF) of Aveiro University

23 | 10th Tech Day - Digital Health: What Changed and Are We Really Prepared? by Altice Labs, with the participation of IMVF’s Chair of the Administration Board, Dr. Paulo Freitas

OCT

2 | IMVF supports the 12th edition of the IMED Conference through the attribution of medical internships in São Tomé and Príncipe

17 | II Seminar on Education for Development “Education for Development and the Sustainable Development Goals”

27 | Webinar “Participation and knowledge networks for municipal international cooperation. Global and Iberian experiences”, organised by CoGlobal

21 | Annual Meeting of Working Groups of the Portuguese Platform of NGDOs

Throughout the year, the IMVF team actively and regularly participated in the Portuguese NGO Platform working groups on Ethics, Development Education, Aidwatch and Advocacy, and has represented the Platform in HUB 1 (Sustainable Development and Policy Coherence for Sustainable Development), HUB 3 (Promoting Civil Society Space) and HUB 4 (Global Citizenship Education and People Engagement) of CONCORD (European Confederation of Relief and Development NGOs), in Brussels.
COMUNICATION AND MEDIA
Given the COVID-19 pandemic, 2020 was a challenging year regarding Communication’s work, which had to adapt to new demands, while keeping the commitment to continue to publicize IMVF’s action, at institutional and project level, also contributing to strengthening IMVF’s reputation in the various areas of intervention and geographies where it operates. More broadly, it also fostered the dissemination of the main themes underlying the area of Development.

Although at a distance (physically), we remained in permanent contact with our stakeholders, working in a committed manner using different digital communication tools, in order to continue our mission to disseminate the work carried out by the IMVF.

Thus, the Image and Events Communication Office (GCIE in portuguese) continued, in 2020, to be an important vehicle in boosting the IMVF website and social networks - at this point we highlight the significant growth of followers on the various networks; in supporting the preparation and production of graphic, audiovisual and merchandising materials, favouring the use of sustainable materials; in creating and sending newsletters on project activities and actions developed either by the IMVF or in partnership; and in supporting and collaborating in the organisation of events and other initiatives of institutional scope or within the projects framework, this time mainly online.

Since it was not possible to carry out communication missions to the countries where IMVF operates, due to the constraints imposed by the COVID-19 pandemic, the IMVF communication team remained committed to deepening working relationships with the in-country team working on several projects, through continuous distance support to the capacity building of local technicians in the communication and similar areas assigned to the projects implemented by IMVF.
